Y-DNA testing at FTDNA, corroborated by testing a cousin's Y and autosomal, determines that Grace's husband Roland Rhoades was not the father, a Mr Peavey was. Family photo comparisons of facial features helps to confirm. Further research now takes this line back, but still looking for dna matches and family photos from this family to confirm the match.

In the spring of 1954 the family, Roland, Marion, dau Lynda and son Roland and family all moved to Phoenix AZ where Ed Boudway said there were jobs. They lasted 3 months before homesickness got them and they moved back to Maine where all their friends and family were. An old photo album says they left Maine April 5 and arrived in Phoenix April 11; they left Phoenix July 22 and got home July 28, 1954. They lived at 3112 E Diamond St. The address on Google Earth in 2012 looks unrecognizable.

Roland and Marion are buried at Maine Avenue Cemetery, Farmingdale ME. Marion's memorial and story is at www.RolandRhoades.com/nana.htm. Roland was a member of the Pipefitters Union, traveling to many places for work. Being a union member, the family has always been strongly Democratic politically. Worked at Bath Iron Works, and helped build the St Lawrence Seaway in NY in the 1950s or 1960s. While at BIW, someone came up to him and said I think I know your sister. He replied, I don't have a sister. This was when he first learned that he did have a half-sister via his father's first marriage, Irma Rhoades Wall Butler. She visited and a group family photo is on my Rhoades family webpage. His father died when he was less than 2 years old. Roland was named after Thomas Edison because his father had worked with and thought highly of him. Roland was also a member of the Freemasons, though I don't recall him ever mentioning it; The Maine Mason magazine just kept coming in the mail. He loved to eat and would have spaghetti eating contests with the Boudway side of the family (Butch Nuzzo). He and Marion bought their house at 133 Northern Avenue Farmingdale [83 after 911 change] around 1933 and lived there their whole lives, until Marion sold it in 2003.

I remember that their phone # when I was a kid was simply "768M", a party line that was frequently being used by a neighbor when you wanted to use it.

My grandfather Roland in a 1990 tape said that he went back and forth from his mother's to his grandmother's

and Uncle John's homes. Quit school at 14 to work. Lots of different schools. Remembers an Uncle Lent, and an Uncle Eanus who carved stuff, even wooden chains.

Genetic tree: 5'2 1/2"; wt 130-150; brown hair/eyes; asthma, allergies, arthritis, bad back; cataracts. Her son Roland took a 23&Me DNA test which identifies his maternal Mtdna line as U2e, which is therefore also Marion's through Peterson, Gross, Borjesson. Haplogroup U2 arose in the Near East about 45,000 years ago. U2e is one of the oldest haplogroups in Europe. It appears to have reached there with some of the continent's first modern human settlers about 35,000 years ago, at a time when Neanderthals were the only Europeans. By the time of the Neanderthals' extinction about 28,000 years ago, haplogroup U2e was probably distributed across much of Europe. But today, thanks to the subsequent arrival of many other haplogroups, it has become relatively rare. U2e reaches its highest levels in places like the town of Murlo, where many inhabitants are thought to be descended from the pre-Roman Etruscan people. It is also relatively common among the Udmurts and Mordvinians, who live in the Volga River drainage and Ural Mountain regions.

124 M i. **Roland³ Edward RHOADES** was born 5 Jun 1930 in Gardiner, Kennebec, ME and died 7 May 2017 in Franklin, Merrimack, NH.

Roland attended Farmingdale and Gardiner schools, graduating from Gardiner High School in 1947. Served in the US Army Air Corps, in charge of sled dogs in Labrador. He moved to Dover NH in 1955 and East Rochester NH in 1959. He worked at GE in Somersworth NH for 11 years. He was a licensed electrician, carpenter and general contractor, a co-owner of a couple companies. He and Muriel were also owners of Hilltop Recreation Center in Somersworth NH, which he built from the ground up in the 1960s to include a golf driving range, go-karts, baseball and softball batting cages, and "Space Age" miniature golf. That was a major news attraction; each hole had a giant theme, like a flying saucer large enough to walk through, that airplane pilots said they used as a bearing for landing at the Rochester airport. It also had space creatures and planets made from steel, chicken wire and mortar. His children always had summer jobs! He was also an Eagle Boy Scout, Order of the Arrow; Scoutmaster in Gardiner ME and Salmon Falls NH; Cubmaster in East Rochester; and served on the vestry as Jr and Sr Warden of the Episcopal Church in Rochester. He converted their summer camp in Sanford to year-round and moved from East Rochester in 1980. He sold his business and retired to Lakeland FL around 1985 in a retirement park where he has been President of the Shuffleboard Club, with many trophies. He and Muriel have led a very active life in the Florida warmth; it's hard to ever find them home. In January 2011, they sold their home in Lakeland and moved in with daughter Nancy in NH.

DNA test results from 23&me: Mtdna U2e1a. Y-dna Rhoades line belongs to Haplogroup R1b1a. 23&me autosomal test, refined Aug 2014, showed 99.8% European, broken down as 41% British & Irish, 14.8% French & German, 8.2% Scandinavian, 29.9% Broadly Northern European, 1.3% Iberian, .5% Broadly Southern European, .1% Ashkenazi, 4.1% Broadly European; .2% East Asian & Native American, .1% Mongolian, <.1% Native American. Broadly means they do not yet have the comparative data to pin it down, but it will eventually increase the Scandinavian and French amounts. This is one reason why they dropped the price to build their database to a million users. His father's story about his g-grandmother (Whalen) being an Indian princess is in question. This test also showed 2.7% Neanderthal dna.

FTDNA test results: Haplogroup is H6a1a2a. [My maternal cousins will be the same - Robertson > Leavitt > Stinneford > Trafton > Penney > Gowen > Cole > Spencer 1698.] H6 is one of the oldest branches of haplogroup H. Its age is estimated at around 26,000 years. It is one of the most frequent branches of H found among Arabian lineages, and is the most frequent branch among those found in Central Asia. It likely originated in the Middle East or Central Asia. H6 is also found at very low frequencies in Europe. I have also uploaded my data to the mtDNA Community website for additional analysis.

23&me test refined Aug 2014 shows 99.9% European, broken down as 64.8% British & Irish, 12.7% French & German, 2.3% Scandinavian, 16% Broadly Northern European, .2% Italian, 2.1% Broadly Southern European, 1.8% Broadly European, .1% unassigned. This test also showed 2.9% Neanderthal dna.
